### How to use this document

- Check the Completed column for every assignment you submitted.
- Check the Bonus column if you completed the bonus requirements. Greyed-out cells mean that assignment has no bonus.
- Fill in the file path to the built executable so we can find your work in the repository.
- Use Notes for known issues, design decisions, or partial completion.
- [L] marks assignments that are part of the Running Project. These assignments still require separate unique executables.

## Gate 1

Complete assignments 1a to 6d and reach 12 points to unlock the Midpoint Project.

| ID | Assignment                    | Completed | Bonus | Folder / File path in repository                                                                                                                                | Notes |
|----|-------------------------------|-----------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|

### Points summary: Gate 1

|                           |  |
|---------------------------|--|
| Regular points (1a to 6d) |  |
| Bonus points              |  |
| <b>Gate 1 total</b>       |  |

## Gate 2

All points across the semester count toward Gate 2. You need 25 points in total, including everything earned in Gate 1 and the Midpoint Project, to participate in the Final Project.

| ID  | Assignment              | Completed | Bonus | Folder / File path in repository | Notes |
|-----|-------------------------|-----------|-------|----------------------------------|-------|
| 9a  | Mechanics Extension [L] |           |       |                                  |       |
| 9b  | Advanced Platformer     |           |       |                                  |       |
| 9c  | Adventure               |           |       |                                  |       |
| 10a | Inventory System [L]    |           |       |                                  |       |
| 10b | Procedural Generation   |           |       |                                  |       |
| 11a | Particle System [L]     |           |       |                                  |       |
| 11b | Simple Shader           |           |       |                                  |       |
| 11c | Polish [L]              |           |       |                                  |       |

### Points summary: cumulative total

|                            |  |
|----------------------------|--|
| Gate 1 total               |  |
| Midpoint Project           |  |
| Regular points (9a to 11c) |  |
| Bonus points (9a to 11c)   |  |
| <b>Cumulative total</b>    |  |

### General comments

Anything else you want the lecturers to know about your submission.
